The technical drawing illustrates the assembly of a control cabinet, divided into two main sections: an exploded view on the left and a detailed internal layout on the right.

Exploded View (Left): This section shows the relationship between the cabinet door (1400) and its internal components. The door is equipped with a handle (3010), a lock (2015), and a latch (3015). The internal components, which are shown in their relative positions as they would be installed, include terminal blocks (1260, 1261, 1262, 1263) and a mounting plate (1400).

Internal Layout (Right): This section provides a detailed view of the cabinet's interior, showing the arrangement of electrical components and their mounting. The components are labeled as follows:

- 1092, 1093:** Mounting brackets for the terminal blocks.
- 1075:** A terminal block.
- 1090, 1091:** Components related to the terminal block assembly.
- 1050:** A component, possibly a fuse or switch, mounted on the terminal block.
- 1070, 1071:** Components related to the terminal block assembly.
- 1080:** A component, possibly a fuse or switch, mounted on the terminal block.
- 1010, 1020:** Components related to the terminal block assembly.
- 1060:** A component, possibly a fuse or switch, mounted on the terminal block.
- 1030, 1032:** Components related to the terminal block assembly.
- 1040, 1041:** Components related to the terminal block assembly.
- 1005:** The main cabinet body.

Terminal Block Details: Two detailed views of the terminal blocks are provided on the right side of the drawing:

- Top Detail:** Shows a terminal block with four positions, labeled 1303, 1304, 1305, and 1306. It is identified as "PT20" and "Hp 35 - kW16".
- Bottom Detail:** Shows a terminal block with four positions, labeled 1303, 1304, 1305, and 1306. It is identified as "PT20" and "Hp 40-50 / kW 30-37".
