

# Atlas Copco Genuine Parts Line Filter Cartridges 'Plus'

## Line Filter Cartridge 'Plus' Range for optimal filtration

Atlas Copco's innovative line filter cartridges are engineered to cost effectively provide the best quality air and meet today's increasing quality demands. The DD/DDp+, PD/PDp+ and QD+ filters are tested and certified according to the latest international standards which efficiently reduce contaminations of oil and dust with minimal pressure drop, resulting in reduced energy consumption.

This performance (good filtration with minimum pressure drop) can only be reached when using the Original Atlas Copco Line Filters Cartridges.

## Improved Lifetime

To guarantee high filtration capacities at the same low energy costs an annual cartridge change (or 4 000 hours, whichever comes first) is essential.

Cartridges with activated carbon (QD) should be replaced yearly or every 1 000 hours.

## Characteristics

The Line Filter Cartridges have different colors for the different filtration grades:

- Light Blue Foam for DD+ and DDp+
- Grey Foam for PD+ and PDp+
- No Foam for QD

## ISO Certification

The Atlas Copco Line Filters Cartridges are ISO certified:

Compressed air - part1: contaminants and purity classes: ISO 8753-1: 2010

Compressed air - part2: test methods for oil aerosol content: ISO 8573-2: 2007

Filters for compressed air - test methods - part1: Oil aerosols: ISO 12500-1: 2007

Filters for compressed air - test methods - part3: Particulates: ISO 12500-3: 2009

# Atlas Copco Genuine Parts

## Line Filter Cartridges 'Plus'

Features	Benefits
Top quality filtration media with large filter surface	The best filtration performance in the market
Synthetic foam	Drainage of oil droplets for the coalescing filter and dust filtration for the bigger particles
Push on element	Easy service, shorter down time
Unique design to work in harmony with the filter housing	Reduced pressure drop contributing to low running costs
Double O-rings	Proper sealing reduces leakage risks and as a consequence increases energy savings
Strong metal core	Prevents element implosion and corrosion
